## 1. What is Schoorbs

Schoorbs is a free room/resource booking system licensed under the GPLv2 which is served as a web application using PHP and MySQL/PostgreSQL.

- [schoorbs-1.0.4.7z](http://static.xhochy.com/software/schoorbs/1.0/schoorbs-1.0.4/schoorbs-1.0.4.7z)  
(<http://static.xhochy.com/software/schoorbs/1.0/schoorbs-1.0.4/schoorbs-1.0.4.7z>)
- [schoorbs-1.0.4.zip](http://static.xhochy.com/software/schoorbs/1.0/schoorbs-1.0.4/schoorbs-1.0.4.zip)  
(<http://static.xhochy.com/software/schoorbs/1.0/schoorbs-1.0.4/schoorbs-1.0.4.zip>)

## 2. Features

- Access it using your favorite webbrowser (valid XHTML 1.1)
- Runs on every webserver supporting PHP(>= 4.3) and MySQL or PostgreSQL.
- Ensures that conflicting entries cannot be entered.
- Selectable **Day / Week / Month** views.
- Very flexible options on resource/room bookings.
- Multiple authentication levels (read-only, user, administrator).
- Multiple languages supported (translated to Czech, Chinese, Danish, Dutch, Finnish, French, German, Greek, Italian, Japanese, Norwegian, Portuguese, Spanish, Swedish).
- Communication with Schoorbs through a REST-API is also possible, so making own scripts/programs using Schoorbs is possible without using PHP.
- Uses the equal database structure as [MRBS](http://mrbs.sf.net/) (<http://mrbs.sf.net/>) , you even could use both in parallel, if you want to evaluate them.

## 3. Contact

All problems about Schoorbs, not depending if they are development related or just a usage question, could be posted on our [mailinglist](http://groups.google.com/group/schoorbs-general-discussion) (<http://groups.google.com/group/schoorbs-general-discussion>) . If you find a bug in Schoorbs or you want to propose a new feature, just submit a new entry at our [issue tracker](http://code.google.com/p/schoorbs/issues/list) (<http://code.google.com/p/schoorbs/issues/list>) .

## 4. Browsing/Getting the complete source

via ...

- [the plain Subversion repository](http://schoorbs.googlecode.com/svn/) (<http://schoorbs.googlecode.com/svn/>)
- [a comfortable sourcecode browser \(WebSVN\)](http://websvn.xhochy.com/listing.php?repname=Schoorbs)  
(<http://websvn.xhochy.com/listing.php?repname=Schoorbs>)
